WHO WE ARE

NALDCCAM is a community based green Agricultural and Livestock Company.

- We manage diverse farming and livestock projects, impacting the lives of millions, and are committed to providing people with new opportunities.
- We collaborate with local populations, engaging them in provincial agricultural operations and projects by creating job opportunities during the projects.

OUR HISTORY

The company went operational in 2013 as a Common Initiative Group with the aim of bringing farmers under a common canopy, forming a synergistic strategic alliance in procuring farm inputs at moderate prices, accessing market outlets, technical know-how and finance. As a common initiative group, it operated with some specific objectives as follow:

- To safeguard members' interests;
- Source and secure funding for the famers' initiatives;
- Developed and promote sustainable agricultural initiatives ;
- Knowledge transmission through workshops, seminars, world cafés, to build and empower members' capacities;
- Mobilize and engage women and youths in sustainable agricultural processes;
- Introduce green agriculture in Cameroon.

Another development came in 2019, when the CIG emerged to a private Limited company known as NTUHSEN AND SONS SARL (NSS). As NSS, we embarked on general supplies, Building/Construction, Opening of farms, Training sessions, Import and Exportation.

In 2022, we are finally settling on NALDCCAM with key operations tilted towards green agriculture, prosperous livestock, agro-processing, knowledge transmission, Research and Development.

VISION

To improve rural livelihoods and sustainable food system through value addition, offering affordable, mechanized agricultural equipment to small and medium scale farmers in order to increase green agricultural production and a prosperous livestock sector in the country.

MISSION

- To continuously offer dependable, agreeable, and equitable priced services to our customers;
- To create a favorable policy and legal framework for the sustainable development of the livestock industry;
- To stay consistent, build trust, and establish sustainable business relationships with customers while capitalizing on green agricultural potentials to preserve the ecosystem, climate resilience, food security, sources of revenue, and economic safe-living in Cameroon.

CORE VALUES

- Integrity
- Accountability
- Customer satisfaction
- Quality-focused
- Proactivity
- Motivation
- Sustainable relationship

OBJECTIVES

- ✓ To train and involve more women and youths in the production and transformation of locally cultivated crops;

- ✓ To ensure organic and green-agro processes in the cultivation, processing and distribution of local produce;
- ✓ To create employment opportunities for displaced youths in the NWR in particular and Cameroon in general;
- ✓ Enhance farmer's income by better utilization and value addition of agricultural produce;
- ✓ Minimize wastage at all stages in the food processing chain by the development of infrastructure for storage, transportation and processing of agro-food produce;
- ✓ Introduce of modern technology into the food processing industries from both domestic and external sources;
- ✓ Encourage research and development in food processing for product and process development and improved packaging;
- ✓ Provide policy support, and support for creation of Infrastructure, capacity expansion/ Upgradation and other supportive measures in the agric-sector;
- ✓ To promote commercialization of beef, dairy, poultry, pig and goat production.
- ✓ To encourage diversified livestock production;
- ✓ To promote proper management of farm animal genetic resources;
- ✓ To encourage conservation, improvement and utilization of indigenous livestock resources;
- ✓ To promote proper management of grazing lands and monitor range resource utilization;
- ✓ To facilitate marketing and trade of livestock and livestock products;

SERVICES

- Establishing leading agriculture farms and production centers according to customer's requirements and market demands;
- Introducing food processing technologies, advanced dairy and meat production, automated hatcheries, slaughterhouses, flour mills, feed plants and packing houses are part of our agro-industrial capabilities;

- Agriculture R&D - Using our in-house technology and know-how to create innovative agro-farming and livestock research stations and laboratories to forecast the future of agriculture.
- Conducting professional Training Seminars /Workshops and World Cafes (agronomy and livestock) for local farmers.
